A change in the size, shape or colour of a mole could be a sign of skin cancer.

Other signs of skin cancer include:
- A new growth or sore that doesn’t heal
- A spot, mole or sore that itches or hurts
- A mole or growth that bleeds, crusts or scabs
- A change in the size, shape or colour of a freckle or normal patch of skin

If you notice any unusual or persistent changes to your skin, go to your doctor.
