Now I'm a toddler I can...
I can help you care for me...

- Hello! If you’ve got a child who, like me, has started to walk this booklet is for you.
- Why? Because it’s here to help you keep me safe now that I can do new things.
- It shows you about some of the ways I can get hurt in an accident.

And it shows you how to make sure that I don’t.

The accidents I’ve chosen are the ones I’m most likely to get badly hurt in.

- Falling
- Burning myself
- Swallowing things
- Drowning
- Fire

Turn over to find out more
I'm not a baby any more...

- You can start to teach me about safety
- But I still find it hard to understand the rules that keep me safe
- So it's safer to watch me and keep me away from danger for now...

Look out for any dangers!

- Every year lots of toddlers like me are rushed to hospital because we've been hurt in accidents.
You need to keep me safe...

- I know you’re very busy and it’s hard to keep up with me.

So I’m making it as quick and easy as I can.

Look at a page with a sad face.
Sad faces show you how children like me can get hurt.

Now look at a page with a happy face. That’s how to keep me safe.
I can move around a lot now...

- I love to run and climb
- I can get to places I’ve never been before

Make sure I don’t fall...
I might fall down the stairs.

Use safety gates to stop me getting to the stairs.
