The Pregnancy Book

Your complete guide to:
A healthy pregnancy
Labour and childbirth
The first weeks with your new baby
The Department of Health would like to thank all those involved in shaping the updated edition of The Pregnancy Book, including the mothers and fathers, medical and health professionals, and the many individuals and organisations. In particular, the Department extends thanks to:

Community Practitioners’ and Health Visitors’ Association
Department for Children, Schools and Families
Department for Work and Pensions
Food Standards Agency
NCT
National Institute for Health and Clinical Excellence
Royal College of Anaesthetists
Royal College of General Practitioners
Royal College of Midwives
Royal College of Obstetricians and Gynaecologists
Royal College of Paediatrics and Child Health
UK Medicines Information
Sheena Byrom, Jill Cooper, Dr David Elliman, Kathryn Gutteridge, Sue Henry,
Dr Judy Shakespeare and Dr Helen Scholefield.

This book is given free to all expectant mothers.

Every effort has been made to make this book reflect the most up-to-date medical advice at the time of publication. Because developments can be very rapid, significant changes will always be notified to doctors and other health professionals at once. They will then be incorporated into the text for the next reprint. For the most up-to-date information and advice, visit the online version of the book (pregnancy planner) at www.nhs.uk/pregnancyplanner

The information on rights and benefits is correct at the time of going to press but may change and should be checked against the latest information.

Having a baby is one of the most exciting things that can happen to you. But you might be feeling nervous as well. If it’s your first baby, it’s hard to know what to expect.

Your mum, colleagues, friends and relations might all be giving you advice. And then there is all the information on the internet as well as in magazines and books. At times it can feel overwhelming and it’s hard to know who is right when people say different things.

This book brings together everything you need to know to have a healthy and happy pregnancy, and to make sure you get the care that is right for you. The guidance about pregnancy and babies does change. So it’s important to get up-to-date, trusted advice so that you can make the right decisions and choices.

If you have any questions or concerns – no matter how trivial they may seem – talk to your midwife or doctor. They are there to support you.

BEFORE YOU GET PREGNANT

- Think about the lifestyle factors that might affect your ability to get pregnant and have a healthy pregnancy (see Chapter 3). This applies to men too. You are more likely to get pregnant if you are both in good health.
  - If you smoke, get advice about stopping. You can talk to your doctor, visit www.nhs.uk/smokefree or call the free NHS smoking helpline on 0800 022 4 332.
  - Eat a balanced diet.
  - Maintain a healthy weight.

- You should avoid drinking alcohol if you are pregnant or trying to conceive. If you do choose to drink, then protect your baby by drinking no more than one to two units of alcohol once or twice a week and don’t get drunk (see page 32).
  - Take exercise.
  - If you or your partner take any medication, talk to your doctor about whether it will affect your pregnancy.

- Take 400 micrograms of folic acid a day. You should continue to take this until you are 12 weeks pregnant (see page 27).

- If you have a health condition, for example mental health problems, diabetes or a family history of any inherited diseases, talk to your GP or a specialist before you try to get pregnant.

- Talk to your GP or a healthcare professional if you have any concerns or need support.
0–8 WEEKS

- You can take a pregnancy test from the first day that you miss your period (see Finding out that you are pregnant on page 16).

- As soon as you know you are pregnant, get in touch with a midwife or your GP to organise your antenatal care (see Finding out that you are pregnant on page 16 and Antenatal care on page 40). Begin to think about where you want your baby to be born (see Choosing where to have your baby on page 70).

- Some pregnant women start to feel sick or tired or have other minor physical problems for a few weeks (see Common minor problems on page 58).

- Take 10 micrograms of vitamin D per day, which is in Healthy Start vitamin supplements or other supplements recommended by your midwife. You should continue to take vitamin D throughout your pregnancy and while you are breastfeeding.

8–12 WEEKS

- You will usually attend your first appointment by 10 weeks and your booking appointment by 12 weeks.

- At the booking appointment, your weight, height and body mass index will be measured. You will be asked about your health and family history as well as about your baby’s father’s family history. This is to find out if you are at risk of certain inherited conditions.

- Your hand-held notes and plan of care will be completed.

- Your midwife will discuss various tests you will be offered during your pregnancy, one of which is an ultrasound scan to check for abnormalities in your baby (see page 48). You will be offered information about what to expect during pregnancy and how to have a healthy pregnancy. Ask if you are unsure about anything.

- You can ask your midwife about your rights at work and the benefits available (see Rights and benefits on page 156).

- You will usually be offered an ultrasound scan between eight and 14 weeks. This will check the baby’s measurements and give an accurate due date. The scan can also detect abnormalities and check if you are carrying more than one baby. Your partner can come along to the scan (see Antenatal care on page 40).

- If you get Income Support, income-based Jobseeker’s Allowance or income-related Employment and Support Allowance or are on a low income and receive Child Tax Credit, you should complete a Healthy Start application form (see page 28). This is to claim vouchers to spend on milk, fruit and vegetables. Healthy Start vitamin supplements (containing vitamin D) are free without prescription for any pregnant woman, new mother or child who gets Healthy Start vouchers (see Rights and benefits on page 156).

- Make a dental appointment. NHS dental care is free during pregnancy and for a year after the birth of your baby.

- Just 12 weeks after conception, your baby is fully formed. It has all its organs, muscles, limbs and bones, and its sex organs are well developed.

- Your baby is already moving about but you cannot feel the movements yet.
12–16 WEEKS

- Find out about antenatal education (see Antenatal care on page 40).
- Start to think about how you want to feed your baby (see Feeding your baby on page 102).
- Make sure you are wearing a supportive bra. Your breasts will probably increase in size during pregnancy so you need to make sure you are wearing the right sized bra.
- If you have been feeling sick and tired, you will probably start to feel better around this time.
- At 14 weeks, your baby’s heartbeat is strong and can be heard using an ultrasound detector.
- Your pregnancy may just be beginning to show. This varies a lot from woman to woman.

16–20 WEEKS

- You may start to feel your baby move (see How your baby develops on page 18).
- Your tummy will begin to get bigger and you will need looser clothes.
- You may feel a surge of energy.
- Try to do your pregnancy exercises regularly (see Your health in pregnancy on page 24).
- Your midwife or doctor should:
  - review, discuss and record the results of any screening tests
  - measure your blood pressure and test your urine for protein
  - consider an iron supplement if you are anaemic.
- Your midwife or doctor should give you information about the anomaly scan you will be offered at 18–20 weeks and answer any questions you have.
- Your baby is now growing quickly. Their face becomes much more defined and their hair, eyebrows and eyelashes are beginning to grow.
- Ask your doctor or midwife to let you hear your baby’s heartbeat.

20–25 WEEKS

- Your uterus will begin to get bigger more quickly and you will really begin to look pregnant.
- You may feel hungrier than before. Stick to a sensible balanced diet (see Your health in pregnancy on page 24).
- Ask your midwife about antenatal education (see Antenatal education on page 56).
- You will begin to feel your baby move.
- Get your maternity certificate (form MAT B1) from your doctor or midwife (see Rights and benefits on page 156).

25 WEEKS (if this is your first baby)

- Your baby is now moving around vigorously and responds to touch and sound.
- If this is your first baby, your midwife or doctor should:
  - check the size of your uterus
  - measure your blood pressure and test your urine for protein.
- If you are taking maternity leave, inform your employer in writing 15 weeks before the week your baby is due. You can claim for Statutory Maternity Pay (SMP) and the Health in Pregnancy Grant at the same time (see Rights and benefits on page 156).
- If you are entitled to Maternity Allowance, you can claim from when you are 26 weeks pregnant (see Rights and benefits on page 156).
- If your partner plans to take paternity leave, they will need to inform their employer.
