TB is curable. Early diagnosis and treatment is the key to stopping TB.

- A cough that lasts for more than three weeks.
- Fever and heavy night sweats.
- Feeling unusually tired or ill. Unexplained loss of weight.
- Not wanting to eat.
- To stop symptoms returning, follow the doctor’s advice and take all the medicine they give you.

TB is curable with a course of special medicines.
TB is curable, if you think you have the symptoms described go and see your doctor.
