FOCUS ON YOUR FOOD

Slow down. Don’t eat on the go or while watching TV. Eat at a table if possible.

Handy hints:
• eating meals at the table will help you focus on the amount of food you eat
• don’t eat while walking, wait until you get there.

DON’T FORGET YOUR 5-A-DAY

Eat at least five portions of fruit and vegetables a day, whether fresh, frozen or tinned (400g in total).

Handy hints:
• a medium sized apple or banana or three heaped tablespoons of peas is one portion
• try having fruit or vegetables with every meal, this makes it easier to reach five a day.

Does being overweight matter?

Being overweight affects your health. It increases the risks of many types of cancer. It also increases the risk of diabetes, high blood pressure, coronary heart disease, osteoarthritis and stroke.

We know how difficult it is to lose weight and keep it off. The good news is that if you are overweight, losing just 5–10% of your body weight and keeping it off will have a positive effect on your health. For most people, this will be around 3–10kg or ½–1 ½ stone.

Shopping Guide

Check how much fat, sugar and salt is in your food

The following information provides you with some simple advice for understanding food labels. Remember that the amount you eat of a particular food affects how much fat, sugar and salt you will get from it.

Based on information supplied by the Food Standards Agency

<table>
<thead>
<tr>
<th>Sugar</th>
<th>Fat</th>
<th>Saturates</th>
<th>Salt</th>
</tr>
</thead>
<tbody>
<tr>
<td>under 5g</td>
<td>under 3g</td>
<td>under 1.5g</td>
<td>under 0.3g</td>
</tr>
<tr>
<td>5g and above</td>
<td>3g and above</td>
<td>1.5g and above</td>
<td>0.3g and above</td>
</tr>
</tbody>
</table>

Due for review by: May 2014
Cancer Research UK is a registered charity in England and Wales (1089464), Scotland (SC041666) and the Isle of Man (1103).
KEEP TO YOUR MEAL ROUTINE
Try to eat at roughly the same times each day, whether this is two or five times a day. This will help you avoid unplanned meals and snacks which are often high in calories.

Handy hints:
• Pick a pattern that fits your daily routine and stick to it
• If you tend to snack, try to snack around the same time each day
• Plan when you intend to eat and check at the end of the day if you have achieved this.

GO REDUCED FAT
Choose reduced fat versions of foods such as dairy products, spreads and salad dressings. Use them sparingly as some can still be high in fat.

Handy hint:
• Change to semi-skimmed milk and save 60 calories a day (based on consuming 300mls of milk a day).

WALK OFF THE WEIGHT
Walk 10,000 steps (equivalent to 60–90 minutes moderate activity) each day. Try using a pedometer to help count the steps. You can break up your walking throughout the day.

Handy hints:
• 5,000 extra steps a day (40 mins walking at a brisk pace) will burn 1,240 calories over a week
• Take the stairs rather than the lift.

PACK A HEALTHY SNACK
If you snack, choose a healthy option such as fresh fruit or low calorie yoghurts instead of chocolate or crisps.

Handy hints:
• Have a banana instead of a standard-size chocolate bar (46g) and save around 150 calories
• Take a piece of fruit to work with you
• Choose yogurts with less than 100 calories per pot. The calcium will also keep your bones healthy.

LOOK AT THE LABELS
Be careful about food claims. Check the fat and sugar content on food labels when shopping and preparing food.

Handy hints:
• A low fat digestive biscuit has the same number of calories as a standard digestive biscuit at 70 calories
• Use the shopping guide in this leaflet to help you make healthy choices.

CAUTION WITH YOUR PORTIONS
Don’t heap food on your plate (except vegetables). Think twice before having second helpings.

Handy hints:
• Cook smaller quantities and eat off a smaller plate
• Put away leftovers as soon as you’ve served.

UP ON YOUR FEET
Break up your sitting time. Stand up for 10 minutes out of every hour.

Handy hints:
• Standing up on the bus or train burns an extra 70 calories an hour
• When watching TV try to stand up during the ad breaks and do a few chores (e.g. wash the dishes or put the rubbish out).

THINK ABOUT YOUR DRINKS
Choose water or sugar-free squashes. Unsweetened fruit juice is high in natural sugar so limit it to one glass per day (200ml or 1/3 pint). Alcohol is high in calories so limit the amount you drink.

Handy hint:
• A pint of ordinary strength beer (3–4%) has two units of alcohol and 182 calories.
